# Senior Backend Developer (m/f/d)

*Full-Time | Toulouse, France*

At innoscripta, we're shaping the future of R&D software — and we need an experienced Backend Developer to help us build and scale the engine behind our platform. If you love clean code, solid architecture, and solving hard backend problems, we'd love to hear from you.

## What You'll Do

---

- ✓ Develop and maintain backend services using clean, scalable Go (Golang) code
- ✓ Implement microservices or modular designs that enable easy scaling and replacement of components
- ✓ Apply best practices for Docker, including image optimization and environment configuration
- ✓ Utilize Go's concurrency features (goroutines, channels) to process transactions efficiently and reliably
- ✓ Develop unit, integration, and feature tests to validate system reliability
- ✓ Use AI agents (Cursor, Copilot, Claude) as a core part of your daily workflow
- ✓ Troubleshoot complex backend issues with long-term, stable fixes
- ✓ Own features end-to-end — from concept to deployment

## What We're Looking For

---

- ✓ 8+ years of professional experience with Go (Golang)
- ✓ Proven track record of building and maintaining high-volume, transactional systems
- ✓ Strong understanding of concurrency, database transactions, and distributed systems
- ✓ Hands-on experience with message brokers (e.g., Kafka, RabbitMQ) in production
- ✓ Deep knowledge of containerization (Docker) and familiarity with container orchestration (Kubernetes is a plus)
- ✓ Experience with CI/CD pipelines (GitHub Actions, GitLab CI, or similar)
- ✓ Fluent in French and English
- ✓ Strong analytical and problem-solving mindset

## What You Can Expect

---

- ✓ International team with flat hierarchies
- ✓ Above-average, competitive salary
- ✓ Real ownership & autonomy over your work
- ✓ Individual growth & training opportunities
- ✓ Fast decision-making in a dynamic environment

## Location

---

Toulouse, France — on-site

## How to Apply

---
